# 3D Nature Environment with Procedurally Generated Terrain and Trees

Name: Liam Ozog  
User ID: lozog  
Student ID: 20515121

## Objectives

---

- **1:** UI: Implement a first-person camera with associated controls to allow navigation of the scene, including movement in 3 axes, speed adjustment, and camera rotation.
  - **2:** Modelling: Add a skybox to the scene using cube mapping.
  - **3:** Implement reflections for water using OpenGL's stencil buffer.
  - **4:** Generate a pseudo-random terrain heightmap with Perlin noise.
  - **5:** Add grass to the scene using billboards to create the illusion of many blades of grass.
  - **6:** Add texture to the ground and foliage using texture mapping.
  - **7:** Use L-systems to procedurally generate trees.
  - **8:** Implement shadows using a depth map stored in an OpenGL frame buffer.
  - **9:** Implement bloom using framebuffer and Gaussian blur.
  - **10:** Objective ten. Use a "screen-door" effect to simulate alpha transparency for grass.
-
